Archive: This message is being viewed in an archive.

Per my voicemail:

See page 52671, especially the bottom of column 2 and the top of column 3.

Idaho NSR - pr.pdf

See page 61109, top of column 1.

N Ada-Boise Final Federal Register

Information that would help our discussion:

- What amount of emissions reductions were attributed to each of the 13 source permits in the maintenance plan?
- What other sources (besides the 13 sources + Amalg Sugar) in the plan's emissions inventory have Tier 2 permits?
- What is the basis/reason for any PM10 conditions in those additional permits? (e.g., Title V exemption, existing federally-approved SIP limit, ensurance of NAAQS compliance/ PSD increment)
